Transaction Report

### Customizable blotter screen saves time and maximizes operational efficiency within the existing Omgeo CTM application by enabling you to customize views and manipulate data

#### About the Trade Blotter Screen

To deliver on the promise of providing the best service and products the industry has to offer, Omgeo has made a significant enhancement to the existing Omgeo CTM user interface by introducing a new Trade Blotter screen. We have listened to your feedback and have built a robust, easy-to-use screen which adds significant value to the Omgeo CTM system. The Trade Blotter screen will be the default screen you see when logging into the system, the rest of the user interface remains the same.

The tabs across the top of the screen represent different trade data views which can be customized according to client preference. You will also notice that the new screen has more industry recognizable terminology:

- Trade Detail = Allocation
- Trade Level & its Trade Details = Trade

#### Key Features

- Sort data – The trades shown in any tab can be sorted in ascending or descending order by one or multiple columns making it easier to find the trades you need to work with
- Filter data – The trades in each tab can be filtered by any column in order to show only the specific set of trades that you want to work with. Multiple filters can be defined on each tab
- Add / remove / reorder columns – Completely customize which columns are shown and in which order

- Trade Level = Block

... All together now.

- Manage views – Add new tabs to the blotter, modify or copy existing tabs, or delete tabs that you do not use. The blotter is completely customizable allowing you to define the views that you want to work with and save them
- Reject or cancel multiple trades – Save time by rejecting or cancelling multiple trades at once
- Export view to Excel –Work with data outside of Omgeo CTM and increase reporting capabilities within your organization
- Print trade confirm – A trade confirmation can be printed with a single click to a printer or PDF file for one or multiple allocations
- Print view – Print the entire view or only selected trades to a printer or PDF file
- Find trades – Search by master reference, client allocation reference, or OASYS Global (OG) reference

#### Key Benefits

- Save time and resources by developing customizable data views within the Trade Blotter screen.
- Maximize internal productivity with the export to Excel functionality for data manipulation and reporting outside of Omgeo CTM
- Enhance your user experience by having the ability to sort and filter data to quickly find relevant trade information and reject or cancel multiple trades at once.

#### About Omgeo

Omgeo creates certainty in post-trade operations through the automation and timely confirmation of the economic details of trades executed between investment managers and broker dealers. Every day Omgeo enables an efficient community of more than 6000 financial services clients in 45 countries to manage matching and exception handling of trade allocations, confirmations, and settlement instructions. Leading organizations rely on Omgeo to help manage an increasingly complex investment industry by providing operational stability and solutions that complement the focus on profitability in an era of escalating trade volumes. Across borders, asset classes, and trade lifecycles, Omgeo is the global standard for operational efficiency across the investment industry. Formed in 2001, Omgeo is jointly owned by the DTCC and Thomson Reuters.
